The **THUNDERSTORM Multi Barrel Launcher** is designed for use with the following types of ammunition:

38mm - 3 Sub Munition Tear Gas Rounds

In order to achieve maximum coverage with the **Multi Barrel Launcher** – ISPra has designed new 38mm Sub Munition rounds which enable the **Multi Barrel Launcher** to disperse up to 36 Tear Gas Capsules in one single Burst.

38mm Long Range CS Smoke Rounds

In order to achieve maximum range with the **Multi Barrel Launcher** – ISPra is offering a long range version of Tear Gas projectiles. These projectiles are made of polymer in order to reduce injuries to a minimum.

38mm Stun + Powder Rounds

To be used in conjunction with tear gas rounds, these rounds help achieve maximum deterrence and confusion in the rioting crowd, detonating over the crowds heads and dispersing pepper or CS powder from above
